

ThraneLINK Management Application

Introduction

The ThraneLINK Management Application (TMA) is a Windows program that provides easy monitoring, remote operation and software update of connected Thrane & Thrane devices with ThraneLINK support.

All Thrane & Thrane devices with ThraneLINK support must be on the same LAN.

(Example)

PC requirements

- Standard PC with Windows 7 or Windows XP and Ethernet
- Make sure that you have administrator rights for the PC.

Installation

To install the TMA, do as follows:

1. Go to www.thrane.com > Down-

loads, locate the TMA software package and download it to your PC.

2. Click **setup.exe** to start the installation wizard.
3. Follow the instructions on the screen.

Using the TMA

1. Connect the PC to the LAN with the Thrane & Thrane units you want to monitor.
2. Click the TMA icon on the PC's desktop. The program starts and displays the units found on the network. If a Windows Security Alert pops up click **Allow access** (Windows 7) or **Unblock** (Windows XP).

3. Click the icon for a device to display status information.
4. Use the active icons at the bottom of the screen and follow on-screen instructions.

Press **F1** on the keyboard or click the question mark icon for online help.

Updating the TMA

Keep the TMA software up to date regularly to support new features and devices. Check for the latest TMA version and updates at www.thrane.com > **Downloads**. Proceed as described in the section **Installation**.

Troubleshooting (Firewall)

If there are problems with the Firewall settings for software upload and diagnostic report for Windows 7, do as follows:

1. In the **Control Panel**, find **Windows Firewall**.

2. Select **Advanced settings**.
3. Select **Inbound Rules**.
4. Check if there is a green check mark at all instances of **mmi_tma_main**.
5. If there is no green check mark, double click on each **mmi_tma_main**. In the tab **General**, under **Action**, select **Allow the connection**.

Icons are grayed out: These devices are inactive or the function is not available. Re-establish the connection to the device.

Missing devices: Check that the device is connected to the LAN and functioning.

Contact for support

Contact your authorized dealer for support questions concerning the TMA.
